Machine Control Technology

Brandon Cook, RBV Contracting

Earn 1 Professional Development Hour

Join us on September 13th from 11:30AM to 1PM for a presentation on machine control technology. Our speaker, Brandon Cook of RBV Contracting, will talk about GPS enabled heavy equipment technology and its application for dike construction at the Pte. Mouillee CDF.

When: Wednesday, September 13th, from 11:30AM to 1PM | Check-in starts at 11:15AM

Where: Fishbone's Greektown, 400 Monroe Street Detroit, Michigan 48226

Menu: Mixed green salad, Atlantic Salmon, asparagus, grape tomatoes and cognac lobster sauce, Baby Back Riblets with BBQ sauce, chef's vegetable, and potatoes with NY cheesecake for dessert.

Cost: \$30

Registration: Please e-mail Pam Horner at pam.horner@usace.army.mil by COB September 11th.

Brandon Cook's Biography | Although Brandon Cook just recently joined the

Cook always knew he wanted to be involved in construction. After receiving his education from Macomb Community College and additional training at Cam-Tech Michigan, Cook began his professional experience by laboring on earthwork and grading projects. He quickly took on greater responsibilities, and was promoted to grade checker (the old fashioned way), and soon was laying out complicated sites and utility projects. Today, Cook is an expert in utilizing machine control technology.

Determined to conquer new challenges (including fatherhood), Cook will apply his industry experience and expertise to his new project management role with RBV Contracting. Cook's background in machine control technology, applying 3D machine technology on Earth moving, Quarry drilling, Milling, Trimming, and both Concrete/Asphalt paving, 3D Modeling, Precision survey site positioning, and Topographic photogrammetry, means he brings a diverse and well-rounded mindset to the RBV team and their diverse range of contracting projects.
